Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 22 November 2004.
- 2a) This action is FINAL. 2b) This action is non-final.

- 6) Other: _____.

DETAILED ACTION

Acknowledgment is made of the receipt and entry of the amendment filed on November 22, 2004. Acknowledgment is made of Applicant's cancellation of Claims 19 and 22-25, and submission of new Claims 26-30. As the claims are drawn to more than one invention, an election/restriction requirement is set forth below.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 26 and 27, drawn to methods of modifying perception of body weight comprising the administration of a mixture of floral odorant and spice odorant, classified in class 424, subclass 725+.
- II. Claims 12-18 and 28-29, drawn to an article of manufacture comprising a container of a composition consisting essentially of a suprathreshold and non-irritant concentration of a mixture of a floral odorant and a spice, classified in class 435, subclass 810.
- III. Claims 20, 21 and 30, drawn to a composition consisting essentially of a suprathreshold and non-irritant concentration of effective amounts of a floral odorant and a spice odorant, the composition being hedonically positive and effective to alter a person's perception of body weight upon inhalation whereby the body weight is perceived as being less than the actual body weight, classified in class 424, subclass 725+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the process for using the product does not require a kit; and, each invention is deemed patentably distinct one from the other.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product, as evidenced by the claims themselves. For instance, the claims as drafted indicate that the instantly claimed compositions can be used in treating a food disorder, treating a psychological disorder, and treating or alleviating stress.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
